

Organization name		Description
AA 	Aluminium Association	The Aluminum Association is an American organization that develops global standards dedicated to the aluminum production, manufacturing and recycling industries. It promotes the production and use of aluminum among these industries and their suppliers.
AAMI 	Association for the Advancement of Medical Instrumentation	AAMI is an organization accredited by the American National Standards Institute (ANSI), which develops standards for the medical device technology industry. Comply with AAMI standards for its products allows a better distribution on the American market, but also that of other countries based on these standards.
AASHTO 	American Association of State Highway and Transportation Officials	AASHTO is the American organization producing standards and specifications that are used in the design and construction of roads and bridges in the United States. If you want to carry out your activity related to transport in the United States or exporting your products, rely on AASHTO standards.
AATCC 	American Association of State Highway and Transportation Officials	AATCC is an American organization dedicated to professionals of textile and clothing. It develops standards, test methods and control materials to guarantee the quality of products related to the textile industry.
ABMA 	American Bearing Manufacturers Association	ABMA is an American association whose activity is based on all aspects of bearing technology. If you are a manufacturer or supplier of bearings, ABMA standards correspond to your activity.
ABNT 	Associação Brasileira de Normas Técnicas	ABNT is the Brazilian organization producing technical standards in Brazil. ABNT standards can allow you to accelerate your development in Brazilian countries or to better understand the best practices of Brazilian manufacturers.
ACI 	American Concrete Institute	The American Concrete Institute is an American organization that distributes technical standards on concrete and its various uses. It promotes principally progress, innovation and collaboration within the concrete industry.
AENOR 	Asociación Española de Normalización y Certificación (Documents UNE / UNE documents)	AENOR is the Spanish organization dedicated to the development of standardization in all Spanish industrial sectors. With the AENOR collection, you have the best practices at your disposal to accelerate your development in Spanish countries.
AFNOR 	Association Française de Normalisation	AFNOR orients and coordinates the French standardization system, promotes and defends French interests in political steering bodies of the European and International standardization. Each year, it develops around 2,000 voluntary standards to enable you to improve performance, competitiveness and quality, and to innovate with a view to sustainability.
AGA 	American Gas Association	The American Gas Association is an organization representing more than 200 local energy companies that supply clean natural gas across the United States. It develops standards to help improve the safe delivery of natural gas to consumers.
AGMA 	American Gear Manufacturers Association	AGMA is an American organization that elaborate technical standards covering the manufacture of gears. You are manufacturers, suppliers or users of mechanical power transmission components, AGMA standards correspond to your activity.
AHAM 	Association of Home Appliance Manufacturers	The Association of Home Appliance Manufacturers represents the home appliance industry in the United States. It distributes standards to help manufacturers develop efficient and effective household appliances in the homes of consumers around the world.
AHRI 	The Air-Conditioning, Heating and Refrigeration Institute	The Air Conditioning, Heating and Refrigeration Institute is a North American professional association representing manufacturers of heating and air conditioning equipment within the global industry.
AIA/NAS 	Aerospace Industries Association of America, Inc	The Aerospace Industries Association is an American organization that represents the aeronautics, space and defense industries in the United States.
AIAA 	American Institute of Aeronautics and Astronautics	The AIAA is an organization dedicated to the global aerospace profession. It develops standards in the field of space technology engineering and aeronautical engineering.
AICHE 	American Institute of Chemical Engineers	The American Institute of Chemical Engineers is an American organization whose activity relates to chemical engineering. If you are a chemical engineer or work in the processing industries, the AIChE standards correspond to your activity.
AIIM 	Association for Information and Image Management	AIIM is a global association dedicated to the industry of information management. If you want to learn more about intelligent information management, lean on to AIIM standards.
AISI 	American Iron and Steel Institute	The American Iron and Steel Institute is an association dedicated to North American iron and steel producers. If you work in the steel industry, the AISI standards correspond to your activity.
ALI 	American Ladder Institute	The American Ladder Institute is an American organization that develops standards for the safe use of scales. If you work in the scale manufacturing industry or scale components, learn yourself about the ALI standards.
AMCA 	Air Movement Control Association International	The AMCA is an international organization whose activity is dedicated to aerial systems. It elaborate standards in the industry of the air movement and control.
ANSI 	American National Standards Institute	The American National Standards Institute is the American organization standards centralizer who accredits standardization institutes. The standards in the collection are aimed at all professional sectors and can help you gain in competitiveness and ensure your sustainability in international markets.
API 	American Petroleum Institute	The American Petroleum Institute develops standards specifically for exploration companies, production of shipping and natural gas and oil supply services. With the API collection, from drilling to environmental protection, you have at your disposal all the experience and expertise of the industry in terms of engineering practices and operation, safety and interoperability of equipment and materials.
ARINC 	Aeronautical Radio Incorporated	The Aeronautical Radio Incorporation is an American organization producing technical standards dedicated to the field of aeronautics. This collection can allow you to know the protocols used in aeronautics or to improve your avionics technologies.
ASA 	Acoustical Society of America	The Acoustical Society of America develops and promotes knowledge and practical applications of acoustics. ASA technical standards covering the entire field of acoustics: acoustics, mechanical vibration and shock, bioacoustics (including animal bioacoustics) and noise.
ASABE 	American Society of Agricultural and Biological Engineers	ASABE is an international organization educational and scientific dedicated to the advancement of engineering applicable to agricultural, food and biological systems.
ASCE 	American Society of Civil Engineers	The American Society of Civil Engineers is a professional organization representing designers and builders of infrastructure in society. It develops standards for the field of civil engineering.

ASD STAN 	Aerospace and Defense Industries association of Europe	The ASD is a European organization representing the aeronautics, space, defense and security industries in Europe. It includes the ASD-STAND association which establishes and develops standards on behalf of the European aerospace industry.
ASHRAE 	American Society of Heating Refrigerating and Air-Conditioning Engineers	ASHRAE is an international technical organization in the field of thermal and climatic engineering. Its activity focuses on building systems, energy efficiency, indoor air quality, refrigeration and sustainability within these industries.
ASIS 	American society for industry security	ASIS is an international association bringing together safety and security professionals. It develops standards and guidelines to meet the needs of security practitioners.
ASME	American Society of Mechanical Engineers	ASME develops codes and standards for the art, science and practice of mechanical engineering.
ASME CODE 	American Society of Mechanical Engineers	Complying with ASME standards for its products guarantees safety, reliability and operational
ASQ 	American Society of Quality	The American Society of Quality is a global organization of quality professionals. It develops standards to help industries to advance their products and services.
ASSP 	American Society of Safety Professionals	The American Society of Safety Professionals (ASSP), formerly the American Society of Safety Engineers (ASSE), is a worldwide organization of health professionals and safety at work. It develops standards to prevent deaths, injuries and illnesses in all industries, government and education.
ASTM 	American Society for Testing and Materials	ASTM develops standards used around the world to improve product quality and safety. They can make it easier for your company to access to markets, and build trust with your buyers and consumers.
ATIS 	Alliance for telecommunications Industry Solutions	ATIS is a standards organization that provides standards and technical solutions to advance the transformation of the information and communications technology (ICT) industry.
AWPA 	American Wood Protection Association	The AWPA is an American organization dedicated to the preservation and sustainable use of wood. AWPA standards are universally specified for wood preservation in the United States and are recognized around the world.
AWS 	American Welding Society	The American Welding Society is an American organization dedicated to the development of the industry welding. These standards can help you improve your performance and stand out from the competition if your activity is related to the welding sector.
AWWA 	American Water Works Association	The AWWA is an international, scientific and educational association founded to improve the quality and supply of water. It provides complete solutions about water ensuring an effective management.
BATTELLE 	Battelle Memorial Institute	he Battelle Memorial Institute is a specialized research and engineering organization. It provides complete scientific solutions to companies and government agencies in several markets such as health, industry, security and the environment.
BHMA 	Builder Hardware Manufacturers Association	The Builders Hardware Manufacturers Association is a professional association representing North American manufacturers of commercial construction hardware. It develops safety standards, codes and regulations related to manufacturers' equipment such as locks, door closers or exit devices.
BICSI 	Building Industry Consulting Services International	BICSI is a professional association that supports the advancement of the information and communications technology (ICT) profession and develops standards for this industry.
BSI 	British Standards Institution	The British Standards Institution is the UK's national standards body. The standards in the collection can help you accelerate your development in England or better understand the best practices of UK manufacturers.
CTA 	Consumer Technology Association	The Consumer Technology Association (CTA), formerly the Consumer Electronics Association (CEA), is a professional association representing the American consumer technology industry.
CIE 	International Comission on Illumination	The CIE is an international organization whose activity concerns light, lighting, color and color spaces. This collection can provide you the necessary knowledge around the light environment.
CNI 	Cesky normalizacni institut (normes CSN)	CNI is the Czech standardization body. If you want to start your business or increase your productivity in the Czech countries, refer to the CNI standards.
CGSB 	Canadian General Standards Board	The Canadian General Standards Board (CGSB) is a federal government agency that develops Canadian CGSB standards in various fields such as construction, food or transportation. If you want to accelerate your development in Canadian countries, CGSB standards can help you.
CSA 	Canadian Standards Association	The Canadian Standards Association is the Canadian standardization organization active in more than 50 technological fields. Thanks to CSA standards, you have the opportunity to accelerate your development in French and English countries or to better understand the best practices of Canadian manufacturers.
CTI 	Cooling Technology Institute	The Cooling Technology Institute is a technical association dedicated to improving the technology, design, performance, and maintenance of evaporative heat transfer systems.
DIN 	Deutsches Institut für Normung	DIN is the German standards organization that develops standards satisfying market requirements in all sectors of activity. This collection can help you accelerate your development in German countries or better understand the good practices of German manufacturers.
VDI 	Association of German Engineer	The VDI is a German association which promotes the advancement of technology and represents interests of engineers and engineering companies in Germany.
VDMA 	Association of German Machinery	VDMA is the association of German machinery and equipment manufacturers.
VDTUV/AD 	Association of Technical Inspection Agencies	The VDTUV is a German association dedicated to technical security and trust in products, facilities and services.
VG/WL 	German Military Standards	The VG is a German organization devoted to armaments.
DS 	Danish Standards Foundation	The Danish Standards Foundation is the national standards body in Denmark. DS standards are suitable for all sectors of activity and can allow you to accelerate your development in the Nordic countries or to better understand the best practices of Danish manufacturers.
ECIA 	Electronic Components Industry Association	ECIA (Electronic Components Industry Association), formerly EIA (Electronic Industries Alliance), is an American organization that develops standards for the electronics industry. Complying with the ECIA standards can allow you to increase your commercial performance, the quality of your products or the satisfaction of your customers, if your activity is related to the field of electronics.
EEMUA 	Engineering Equipment and Materials Users Association	EEMUA is an international organization whose activity is based on equipment and materials engineering. It publishes standards for the engineering industry. If you own or operators of industrial fixed assets, the EEMUA standards correspond to your activity.

 EUROCAE	The European Organisation for Civil Aviation Equipment	EUROCAE is a European organization focused on electronic equipment for air transport. It establishes standardization rules for the systems and equipment used by civil aviation in Europe.
 FCI	Fluid Controls Institute	The Fluid Controls Institute is a professional association of manufacturers of control equipment and conditioning fluids.
 FORD	Ford Motor Company	The FORD company is an American automobile manufacturer establishing FORD standards to guarantee the purchase of safe and reliable vehicles.
 GM	General Motor	General Motor is an American automobile manufacturer setting GM standards to ensure the manufacture of reliable, economical and anti-pollution vehicles.
 GOST	Gosudarstvennye Standarty State Standard Gost	The Gosudarstvennye Standarty State Standard Gost is the Russian standardization body which is responsible for editing the collection of GOST standards. The documents developed by the GOST give you the best practices of Russian manufacturers in order to advance your development.
 HI	Hydraulic Institute	HI is an association of pump manufacturers in North America. It develops industry standards for pumps and pumping systems.
 IATF	International Automotive Task Force	The International Automotive Task Force is an "Ad Hoc" group formed by manufacturers automobiles and supplier associations of all ranks. The documents developed by IATF can be useful to you if your activity is related to the automotive industry and you wish to obtain IATF certification.
 ICAO	Organisation de l'Aviation Civile Internationale	The ICAO is an international organization dedicated to the safety and security of air transport. It develops standards for the field of civil aviation, whether for personnel, air traffic, accident protocols or pollution control.
 ICEA	Insulated Cables Engineers Association	The Insulated Cable Engineers Association is a professional organization dedicated to developing cable standards for the electrical power, control and telecommunications industries.
 IEC	International Electrotechnical Commission	The IEC develops international standards for electrotechnology products, systems and services. These documents allow you to design products that are accepted all around the world and to access international markets.
 IEEE	Institute of Electrical and Electronics Engineers	The IEEE is a global organization dedicated to high technology, composed by professionals of the industry from more than 160 countries. The IEEE provides standards that establish specifications and procedures designed to help you optimize the reliability of materials, products, methods, and/or services related to electrical or electronics.
 IPC	Association Connecting Electronics Industries	IPC is the global association for electronics manufacturing. If you are a supplier to the electronics industry, or a manufacturer of printed circuit boards, cables and wire harnesses, IPC standards can help you strengthen your bottom line and build quality and reliable electronic products.
 IRIS	International Railways Industry Standard	UNIFE (Union of European Railway Industries) is an association of main manufacturers and railway equipment manufacturers europeans, which develops for the railway sector the reference document "Rules IRIS Certification™: 2017" which can be useful if your organization wishes to obtain the IRIS certificate.
 ISA	International Society of Automation	The International Society of Automation is a standards organization dedicated to the industrial automation sector with 4,000 industry experts cooperating with more than 140 committees. ISA automation standards are suitable for all industries and can help you improve process efficiency and reduce costs.
 ISUZU	ISUZU Motor Company	ISUZU is a Japanese automobile manufacturer developing standards for the production of off-road utility vehicles and trucks light weight.
 JAA	Joint Aviation Authorities	The JAA is a Dutch organization associated with the European Civil Aviation Commission (ECAC) specializing in the air transport sector.
 JACOBS	Jacobs Publishing	Jacobs Publishing is a publisher of various international journals in the fields of clinical and medical sciences, life sciences, chemistry, engineering and pharmacy.
 JEDEC	Joint Electron Device Engineering Council / Solid State Technology Association	JEDEC is a semiconductor standards organization that develops standards for the microelectronics industry.
 MIL	Military Standard	A MIL standard is a standard of the Department of Defense of the United States, also referred to as the "US military standard".
 MPIF	Metal Power Industries Federation	The Metal Powder Industries Federation is a federation of six professional associations focused on various aspects of powder metallurgy, metal powders and particulate materials.
 JIS	Japanese Standards Association	The Japanese Industrial Standards Committee is the organization in charge of developing Japanese Industrial Standards (JIS). These standards cover a wide range of products and technologies ranging from robots to Chinese characters. The JIS collection can help you accelerate your development in Japanese countries or better understand the good practices of Japanese manufacturers.
 MSS	Manufacturers Standardization Industry	The MSS is an organization for the industry development. It develops codes and standards manufacturers giving standard engineering practices to the industries concerned (nuclear energy, waste management, oil industry). MSS standards can help you improve the quality and safety of your piping systems.
 NACE	National Association of Corrosion Engineers	NACE International was founded in 1943 by eleven corrosion engineers from the pipeline industry. Since then, NACE International has become the world leader in the development of corrosion prevention and control standards, certification and education.
 NAVISTAR	Navistar Inc.	Navistar is an American company whose activity is centered on the construction of trucks, buses and engines.
 NBBI	National Board of Boiler & Pressure Vessels	The National Board of Boiler & Pressure Vessels is an organization focused on the safety of pressure equipment. It publishes NBIC standards to maintain uniformity in the construction, installation, repair, maintenance and inspection of pressure equipment.
 NECA	National Electrical Contractors Association	NECA is an association dedicated to the electrical industry by setting standards for traditional and integrated electrical systems. It represents the electrical construction industry that brings electricity, light, and communications technology to buildings and communities across the United States.
 NEMA	National Electrical Manufacturers Association	The National Electrical Manufacturers Association is an American standards organization dedicated to electrical equipment. If your activity is related to the electrical industry, NEMA technical standards can help you improve the safety of your electrical products, reduce your costs and gain competitive advantages.
 NEN	Netherlands Standardization Institute	The Netherlands Standardization Institute is the national standards organization of the Netherlands. NEN standards can allow you to better understand the good practices of Dutch manufacturers and accelerate your development in this country.

NFPA 	National Fire Protection Association	The National Fire Protection Association is a global organization that develops standards to limit the risks and effects of fire. NFPA standards can help you reduce hazards from fires, electrical hazards, and other related risks, whatever your industry.
NISO 	National Information Standards Organization	The National Information Standards Organization is an organization dedicated to standards in the field of publishing, libraries and access to information.
NLB 	National Lighting Bureau	The NLB is an organization founded to educate lighting decision makers.
NQSA 	Nuclear Quality Standard Association	The Nuclear Quality Standard Association is a non-profit association dedicated to the industry nuclear. You are electricians, engineers or nuclear manufacturers, these are the reference standards for nuclear safety and quality management systems for the nuclear sector.
NSF 	NSF International	NSF International is a global organization specializing in the quality and safety of food, water, health products and the environment. It develops standards for public health, environmental and sustainability.
NS 	Standard Norge	Standard Norge is the Norwegian organization responsible for developing and publishing standards Norwegians. These documents, adapted to all professional sectors, can be used to accelerate your development in the Nordic countries.
ON 	Österreichisches Normungsinstitut	The Österreichisches Normungsinstitut is the Austrian standardization body. If you wish to develop your activity in the Austrian countries, this collection can allow you to accelerate your development or to better know the good practices of the industrialists of this country.
PFI 	Pipe Fabrication Institute	The PFI is a standardization body which elaborate standards for the manufacturing and installation industry of pipes.
PIA 	Parachute Industry Association	The Parachute Industry Association is an organization dedicated to the skydiving industry. It develops standards to guarantee the performance and safety of military, commercial and sports parachutes.
PIP 	Process Industry Practices	The PIP is an organization that develops industrial practices and develops work related to maintenance.
PKN 	Polski Komitet Normalizacyjny	The Polski Komitet Normalizacyjny is the Polish standardization institute. Complying with PKN standards can allow you to increase your development in Polish countries.
PPI 	Plastics Pipe Institute	PPI is a professional association representing all segments of the plastic piping industry. It promotes the contemporary use of plastic piping in various applications such as water, sewers, gas distribution and oil production.
PTI 	Post Tensioning Institut	The PTI represents a community of companies and professionals dedicated to the expansion of the post-tensioning applications quality.
RTCA 	Radio Technical Commission for Aeronautics	The Radio Technical Commission for Aeronautics is an American organization producing technical standards dedicated to aeronautical technology. These standards can allow you to better understand the protocols used in air transport systems or improve your avionics technologies.
SAC 	Standardization Administration of China	The Standardization Administration of China is China's standardization body. You will find in this collection the best practices of Chinese manufacturers that can help you intensify your development in these countries.
SAE 	Society of Automotive Engineers	SAE International, an international organization based in the United States, develops standards to advance mobility engineering all around the world. These documents can help you improve quality and processes if your activity is related to aerospace, automotive and commercial vehicles
SCC 	Standards Concil of Canada	The Standards Council of Canada is a Canadian standards organization dedicated to the welfare, health and economic prosperity of Canada.
SCTE 	Society of Cable Telecommunications Engineers	The SCTE is a professional association dedicated to cable telecommunications engineering.
SEMI 	Semiconductor Equipment and Materials International	Semiconductor Equipment and Materials International is an industrial association involved in the supply chain of the design and manufacture of electronic products.
SFS 	Finish Standards Association	SFS is the Finnish standards body. If you wish to accelerate your development in the Nordic countries, the SFS provides you the good practices from Finnish manufacturers.
SIS 	Swedish Standards Institute	The SIS is the Swedish standardization organization active in various fields. SIS standards can allow you to better understand the best practices of Swedish manufacturers and accelerate your development in this country.
SNV 	Swiss Association for Standardization	SNV is the Swiss standardization body. The documents in the collection include all the processes and practices followed by Swiss industries.
SNZ 	Standard New Zealand	Standards New Zealand is New Zealand's national standards body.
STAHLSCHLÜSSEL 	STAHLSCHLÜSSEL	The STAHLSCHLÜSSEL is a book dedicated to the steel industry.
SES 	Society of Standards Professionals	The Society of Standards Professionals is a professional association dedicated to advancing the knowledge and use of standards and standardization.
SMACNA 	Sheet Metal and Air Conditioning Contractors National Association	The SMACNA is an organization that develops technical standards dedicated to the sheet metal and air conditioning industry.
STDMETH 	Standards Methods	The STDMETH represents the standard methods for the examination of water and wastewater. They include hundreds of analytical techniques for determining water quality. It is a joint publication of the American Public Health Association (APHA), the American Water Works Association (AWWA) and the Water Environment Federation (WEF).
TAPPI 	Technical Association of the Pulp and Paper Industry	The Technical Association of the Pulp and Paper Industry is an organization dedicated to the pulp and paper industries.
TECHAMER 	TechAmerica	TechAmerica is an American association dedicated to technology in the United States.
TIA 	Telecommunications industry Association	The Telecommunications industry Association is an organization that develops standards for a wide variety of information and communications technology (ICT) products.
UL 	Underwriters Laboratories	The Underwriters Laboratories is an American organization that elaborate certifications guaranteeing the compliance of a product with the safety and quality requirements applicable in the United States and Canada. UL standards can bring safety, security, durability and interoperability to your innovations.
UNI 	Ente Nazionale Italiano di Unificazione	UNI is the Italian standardization organization that develops, publishes and promotes standards. The UNI standards are adaptable for small companies, multinationals, public organizations, associations, unions or NGO and can give you good practice from Italian industrials.
